                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        The present invention relates to a DNA vaccine effective for eliciting an immune response against cancer cells which comprises a DNA construct operably encoding at least one cancer-associated Inhibitor of Apoptosis-family protein (IAP-family protein) and at least one immunoactive gene product in a pharmaceutical carrier. The invention is useful for treating cancer such as lung cancer, colorectal carcer and melanoma. The present sequence is the human livin alpha splice variant DNA.

The protein is characterised by structural features common to the inhibitor of apoptosis protein family. The HIAP3 polypeptides can be used for the treatment of a disease state in a human patient, which is associated with inappropriate apoptosis and the patient is in need of increased levels of the polypeptide. Ribozymes, which target RNA encoding the polypeptide coding sequences, are useful for decreasing levels of the polypeptide for treatment of inappropriate apoptosis. Antisense nucleotide sequences are also useful for decreasing levels of the polypeptide. Regulation of inhibitor of apoptosis proteins may be useful in treatment of cancer, chronic viral infections, neurodegenerative disorders, chronic heart failure and dysfunctional

```
The present sequence encodes a human proliferation and apoptosis related protein (PROAP). The polypeptides and polynucleotides can be used for the diagnosis, treatment and prevention of cell proliferative, immunological and reproductive disorders. Disorders associated with decreased expression or activity of include arteriosclerosis, cirrhosis, hepatitis, psoriasis, melanoma, lymphoma and canneers of the breast, brain and prostate, acquired immune deficiency syndrome (AIDS), allergies, anaemia, asthma, diabetes mellitus, osteoarthritis, endometriosis, uterine fibroids and disruptions of the menstrual cycle. Antibodies against proap can be use in diagnosis of disorders characterized by PROAP e.g. in ELISA (enzyme linked immunosorbent assays) and the polynucleotides may be used to detect and quantify gene expression in biopsied tissues. These techniques can also be used to monitor regulation of PROAP levels during
                                           therapeutic intervention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                         New human proliferation and apoptosis related protein polypeptides used for diagnosis, treatment and prevention of cell proliferative, immunological and reproductive disorders.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Ś
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            밁
                                                                    The present invention relates to the human proliferation and apoptosis related protein (PROAP) and its encoding nucleic acid. The invention is useful for diagnosing, preventing or treating disorders associated with altered expression or activity of human PROAP, such as cell proliferative (e.g. cancer or atherosclerosis), immunological (e.g. acquired immunodeficiency syndrome (AIDS) or allergies) or reproductive (e.g. infertility) disorders. The invention is also be used in screening for drugs that may be used for treating or preventing the disorders mentioned above and in gene therapy. The present sequence is the human PROAP-18
                                                                                                                                                                                                                                                                                                                                                                                   New human proliferation and apoptosis related proteins and polynucleotides for diagnosing, preventing or treating disorders associated with aberrant protein expression, e.g. cancer, AIDS, atherosclerosis or infertility.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Tang YT,

/note="Organ: Eye; Vector: pcMVSPORT6; A human lens
library (by) was normalized by self-subtraction. One
portion of double stranded plasmid DNA representing the
library was linearized by NotI. This NotI digested library
was used as template for biotinylated RNA synthesis
using SP6 RNA polymerase. Another portion of the double
stranded plasmid library was converted to single-stranded
circles in vitro using Gene II and Exonuclease III (Life
Technologies). Single-stranded DNA (1 mg) was hybridized
(COt 500) with 41 mg of Bio-RNA and vector blocking
oligonucleotides. The hybridized Bio-RNA/se-circles were
was performed on the library at the NIH Intramural
Sequencing Center(NISC)."

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               (bases 1 to 603)
                                                                                                                                                                    /note=Torgan: eye; Vector: pT7T3-Pac (Pharmacia) with a modified polylinker; Site 1: EcoR I; Site 2: Not I; UI-B-DW0 is a cDNA library containing the following tissue(s): lens. The library was constructed according bonaldo, Lennon and Soares, Genome Research, 6:791-806, 1996. First strand cDNA synthesis was primed with an oligo-dT primer containing a Not I site. Double stranded cDNA was ligated to an EcoR I adaptor, digested with Not I, and cloned directionally into DT73-Pac vector. The first-strand cDNA contains a library tag sequence that is sequence tag for this library is CGATTRAGCGA. This library was created for the program, Gene Discovery in the Visual System, supported by National Eye Institute (NEI)."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 sapiens
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                747
